

A Brand-new Experience!

Our 7 **Celki VitalAire Experience Centres (CMEC)** aim to provide personalized and superior services to customers in a harmonious and comfortable ambience as their own homes.

Various respiratory failure, sleep apnea devices and masks are available in our CMEC for customers to try inside our private sleep experience room, or having discussion at the independent discussion tables.

Sleep Experience Room

A room in home-setting for customers to relax and try respiratory machine or have mask fitting without being disturbed by noises and other activities in shop. Customer's privacy is ensured.

Independent Discussion Tables

To upload / download and brief reports for customers (such as sleep / ventilation device usage and oximetry test report), as well as to advise on other products and services.

Recovery answers to Sleep Apnea

Your patients
are in good hands

Rely on Celki:

We will closely monitor patients at home.
Make them satisfied, and improve their quality of life.

We believe a successful CPAP treatment rely on an early and intensive home visit and telephone follow-up program.
CPAP treatment's effectiveness is based on patient's adaptation, comfort, and compliance.

Challenge

CPAP patients may encounter problems, such as discomfort, air leakage, mouth dryness. Clinical evidence shows that intensive follow up actions are beneficial to patients.

Clinical Evidence:

Telephone Coaching

Helps the patient to reduce the daytime sleepiness, improves the knowledge of CPAP treatment and device, and improves patient's perceived benefit.

Intensive Home Care Support

During the first few months of therapy, support CPAP patients with intensive home care support:

1. Have a lower drop-out rate since compliance data is monitored closely and therapy problems are addressed immediately.
2. Have a mean daily usage of therapy 20% higher than those patients on standard support.

By D. Damjanovic; Compliance in sleep apnoea therapy: influence of home care support and pressure mode; Eur Respir J 2009; 33: 804-811

Multi-Layered Approach

"Improvement in patient adherence to CPAP therapy requires a multi-layered approach, using combined technological, behavioral, and adverse-effect interventions."

By Bollig SM; Hays Medical Center-Sleep and Neurodiagnostic Institute, USA 2010

Early Education

"Initial experience with CPAP appears to be important, reinforcing the need for early education and support in these patients."

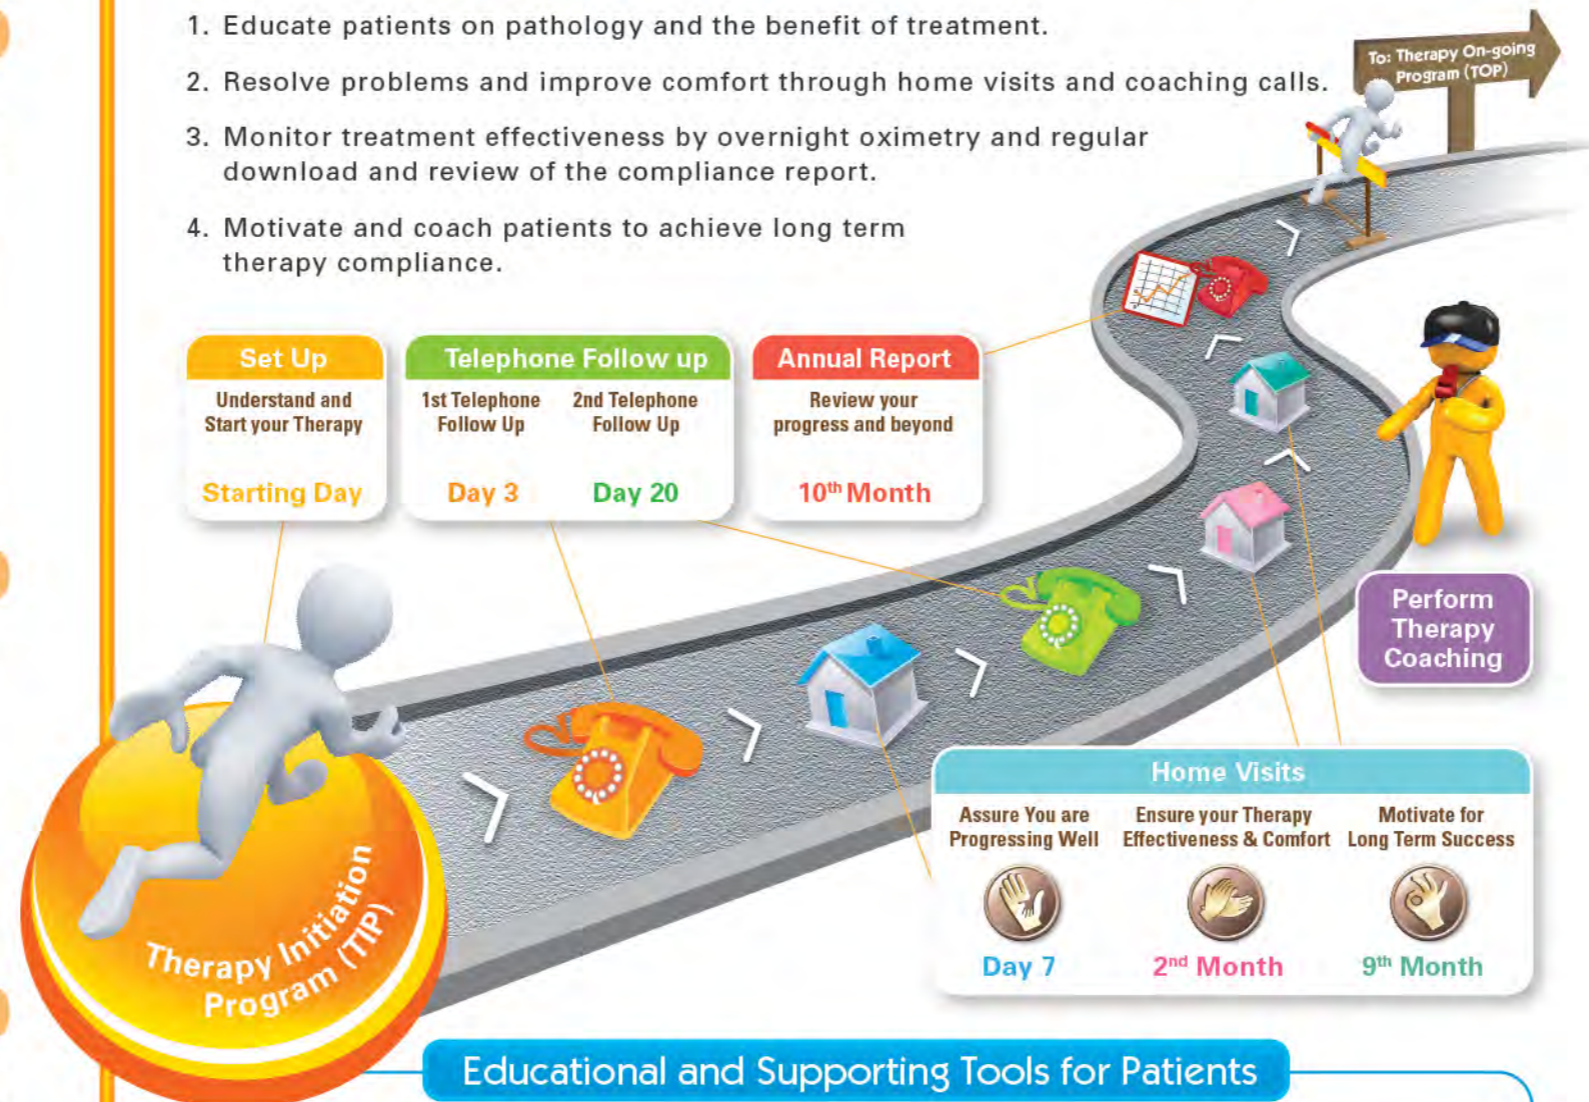

By Wolkove & Baltzan; Mount Sinai Hospital Centre, Canada 2008

With Recovery, each patient will be offered:

Therapy Initiation Program (TIP)

In the first year, "TIP - Therapy Initiation Program" is provided **FREE-OF-CHARGE** and aims to:

1. Educate patients on pathology and the benefit of treatment.
2. Resolve problems and improve comfort through home visits and coaching calls.
3. Monitor treatment effectiveness by overnight oximetry and regular download and review of the compliance report.
4. Motivate and coach patients to achieve long term therapy compliance.

Home Visits

Educational and Supporting Tools for Patients

* Picture for reference only

Therapy On-going Program (TOP)*

In the second year and onwards, "TOP - Therapy On-going Program" aims to ensure:

- Long term treatment effectiveness by continuous home visits and telephone coaching.
- Long term CPAP device functionality by regular preventive maintenance.

* TOP is an affordable annual service program.

Sleep Tele-monitored And Reinforced Titration Program (START)*

"START - Sleep Tele-monitored And Reinforced Titration Program" is a 2-week intensive program. Using daily telemonitoring for patients who seek for full support before investing in their treatment.

* START is an affordable 2-week service program.
